<b>Office Action Summary</b>	<b>Application No.</b> 09/852,049	<b>Applicant(s)</b> FIRMAN, THOMAS R.
	<b>Examiner</b> Daniel D. Abebe	<b>Art Unit</b> 2626

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
  - If no period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(o).

#### Status

- 1) Responsive to communication(s) filed on 18 June 2010.
- 2a) This action is FINAL.      2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

***Response to Arguments***

Applicant's arguments filed on 6/18/2010 have been fully considered but they are not persuasive.

The applicant argument is non responsive to the non final rejection issued on June 18, 2009. In fact, the remarks in the argument appear to be an exact copy of the argument submitted on March 10, 2009 to a different office action. Therefore, since the claims have not been amended to change the scope of the invention or to overcome the prior art applied by the examiner and the remarks do not address the office action of record (6/18/09), the claims are rejected under the same prior art and the corresponding rationale and the previous rejection has been herein reissued.

***Claim Rejections - 35 USC § 112***

Claim 24 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 24 recites the limitation "said set of internal representation" in line 5. There is insufficient antecedent basis for this limitation in the claim.

***Claim Objections***

Claim 19 objected to because of the following informalities:  
The claim recites the limitation "said device" in line 4. There is insufficient antecedent basis for this limitation in the claim. Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 17, 19, 20, 22 and 24 are rejected under 35 U.S.C. 102(e) as being anticipated by Goldhor et al. (5,231,670).

As to claims 17 and 24 Goldhor teaches a voice interface system (Fig.1) for inputting a command to a program for generating text from a voice input that divides the processing of each speech event into a dictation command event and a text event, comprising:

A speech recognizer (16) for recognizing various dictation event and generating the corresponding command signal to a computer; and

A speech to text converter (20) for converting a speech input to text in accordance to the dictation event and previous inputs indicative of the state of the application (abstract; Figs.1, 12; Col.1, lines 55-60; Col.2, lines 20-25; 40-55; Col.8, lines 40-54).

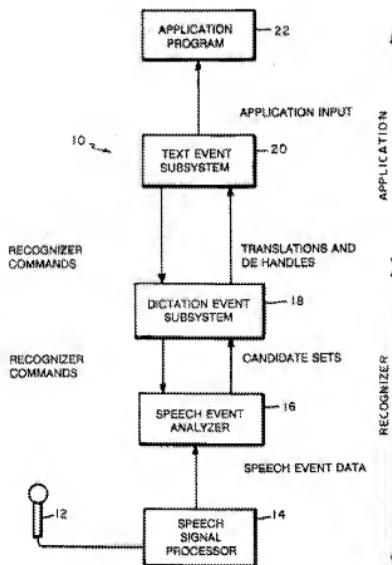

FIG. 1

Regarding the additional elements of claim 24, Goldhor teaches vocabularies comprising commands and non command text and where a best match is chosen/mapped from the utterance and the system state (Figs.1-4)

As to claim 19, Goldhor teaches the system converting voice utterances into commands and dictation events (Fig.1).

As to claim 20, Goldhor teaches where the system is operated via keyboard and other inputs in addition to the speech input (Col.6, lines 40-48; Col.7, lines 23-30)

As to claim 22, Goldhor teaches a system for enabling voiced utterances to be substituted for manipulation of a pointing device, the pointing device being of the kind which is manipulated to control motion of a cursor and its position on a computer display and to indicate desired actions associated with the position of the cursor on the display, the cursor being moved by voice command comprising

a voice recognizer for recognizing a voiced utterance, and an interpreter for converting the voiced utterance into control signals which will move the cursor to a position stated by the speaker and create a desired action at the position of the cursor (Col.10, lines 2-45).
